CAVAL

CAVAL Collaborative Solutions Member Meeting

Friday 27th May 2005, 9.30 am – 4.00 pm
TEC Conference Room,
La Trobe R&D Park

Why attend?

This important event will allow staff from CAVAL Member and Associate Member institutions to gain a deeper understanding of the varied activities of the CAVAL committees and groups. At the same time, CAVAL will hear from our Members and Associates about the issues that are important to them, helping CAVAL shape future services and developments.

Who should attend?

Although numbers are limited, attendance is open to delegates from each Member and Associate Member institution. Ideally delegates should be a mixture of operational and managerial staff. The twin aims of allowing members to hear about CAVAL activities and for CAVAL to listen to our members means that a variety of inputs from across the library spectrum will be most useful.

The keynote speakers.

Paul Reekie General Manager, CSIRO PUBLISHING.

With a Business Administration degree from the University of Western Ontario in Canada, Paul came to Australia in 1971 on holiday and started a publishing career that has continued ever since: McGraw Hill, Sydney, 1972–76; Copp Clark Pitman, Toronto, 1976–81; Barron's Publishing, Sydney 1981-82; Pitman Publishing, Sydney and Melbourne, 1982–87; CSIRO Books & Journals 1987–95, and CSIRO PUBLISHING 1995 – present with the business producing journals, books, multimedia and magazines.

CSIRO PUBLISHING has been at the forefront of the Australian industry in putting content online and using the global reach of the web to market its products internationally. In the last year the business has added journal archives dating from 1950 to its online content.

Dean Mason is CEO of Lucia Publishing Systems and a director of Enakt Pty Ltd and CAVAL Ltd. Lucia Publishing Systems was established recently to commercialise the print-on-demand software developed at the University of Queensland. Prior to establishing Enakt in 2003, Dean worked with Common Ground on the innovative creator-to-consumer research project. He was a director of a leading library supplier, Mason's Book Centre, providing libraries throughout Australia and New Zealand with a range of book acquisition services.

Cost:

CAVAL Collaborative Solutions will sponsor this very special day. There is *no cost* to member and associate member institutions.

RSVP:

Please register by May 20th at 9459 2722 or to caval@caval.edu.au
